

## Strategy and architecture: Information Strategy: Strategic planning ITSP

### **Description**

The creation, iteration and maintenance of a strategy in order to align organisational actions, plans and resources with business objectives and the development of plans to drive forward and execute that strategy. Working with stakeholders to communicate and embed strategic management via objectives, accountabilities and monitoring of progress.

### **Level 7**

Leads the definition, implementation, and communication of the organisation's strategic management framework and directs the creation and review of a strategy and plans to support the strategic requirements of the business.

### **Level 6**

Sets policies, standards, and guidelines for how the organisation conducts strategy development and planning. Leads and manages the creation or review of a strategy which meets the requirements of the business. Develops, communicates, implements and reviews the processes which ensure that the strategic management is embedded in the management and operational plans of the organisation.

### **Level 5**

Ensures that all stakeholders adhere to the strategic management approach and timetables. Collates information and creates reports and insights to support strategy management processes. Develops and communicates plans to drive forward the strategy. Contributes to the development of policies, standards and guidelines for strategy development and planning.
